

Go to: WWW.Foresthoa.net
Click on 'register' in the upper right corner.

Click on "register" and a new window will open, as shown below.

Fill in the info.
Select "owner" option

Fill in email, phone
Make up a password (NOTE- the admin cannot see your password so if you forget it you will have to reset it)

Add other family members to your account if you like. More than one account can be made for each owner if you like.

Click "add address" and a new panel will appear, below.

Select "inside the community" and fill in your address, including lot #

If you want to add another address, click here and a new panel will appear. Once you are registered, you can choose what info appears on the owners-only Directory, so you can exclude phone, home address, etc if you like

Then click register! There will be a delay before the admin confirms you are actually an owner, and activates your account. Once that happens, you can log in by clicking the "login button".

Add your email address and your password. If you have a private device you can click "remember me" and it will remember you, but not necessarily your password!

Mahalo!
